- Responsive Web Design
- UI/UX
- Search Engine Optimization
- Problem Solving
- Effective Communication
- Critical Thinking

## LANGUAGES

- English (Fluent)
- Arabic (Fluent)

## PROFILE

A passionate frontend developer skilled in React.js and Tailwind CSS, with advanced knowledge of JavaScript. I am driven by the thrill of solving problems and the endless potential to enhance and evolve websites. My strength lies in my determination to learn and adapt; even if I don't know the solution to a problem right now, I'll always find a way to learn and solve it. I live by the belief: 'True ignorance lies in thinking you already know everything—growth begins with curiosity and humility.' I'm constantly striving to learn, improve, and build exceptional web experiences.

## PROJECTS

**FreelanceHub**                                        2024 AUGUST

Open Site

- Helps freelancers find jobs quickly and efficiently by providing tailored results with ease.
- The site fetches jobs using APIs and displays them in a user-friendly interface. It includes advanced filters, a dark mode, and a fully responsive design for seamless use across all devices.
- Built using React.js and Tailwind CSS to deliver a modern, responsive, and visually appealing experience.

**Test Generator**                                        2024 JULY

Open Site

- Allows users to create tests easily in their desired field with minimal effort.
- Automatically generates tests using APIs based on user inputs, with an option for manual creation. Fully responsive design ensures usability on any device.
- Built using React.js and Tailwind CSS.

2024 JULY

**Food Recipe**

Open Site

- Helps users quickly find recipes for any dish they want, saving time and effort.
- Fetches recipes via API, displays dish images, allows users to rate dishes with stars, and offers a user-friendly, fully responsive interface.
- Built using React.js and Tailwind CSS.
